To: The Office of Environmental Protection Agency's

I am writing this letter to your offices as a concerned citizen of our environment.

I was an employee of International Paper Company for eighteen years. My capacity for twelve years at the Phila., Pa. plant was Warehouse Manager, as the manager of this department I was instructed to dump all our HAZARDOUS WASTES into a field located in the back of this plant (approximately 3 acres). There was APP 1-55 gallon drum per day dumped. There was a constant large pool of this HAZARDOUS MATERIAL visible in this area.

This plant is a manufacturing facility of paper milk cartons, which are printed with an oil base ink. The products that were dumped were oil base printing ink, adhesives, adhesives, alcohol, and all solvent by-products were disposed of in this matter.

These products are stated as HAZARDOUS MATERIAL. International Paper Company at one time had sixteen of this type plant in operation. I am fully aware of other plants having the same practice of disposing HAZARDOUS WASTES as the Philadelphia, Pa. plant. I am notifying all District Offices of the E.P.A. in the respective areas.

All plants areas are listed open and closed. I will enclose my mailing address and phone number where I can be reached, for any assistance. I can give your office. I would like to receive a copy of any correspondence that takes place in this investigation.

Respectfully,

(b) (6)
